

Pablo Canamasas

Pablo lives in Argentina and is an agriculture scientist specializing in olive oil production and oil quality. He has been in the olive industry for 24 years, spending most of his professional carrier Oil Production Technical Manager in Australia. Currently, he is an olive oil production consultant in over ten countries including North America, Japan, Argentina, Australia, Chile, Brazil, Israel, China, Mexico and New Zealand.

Initially Pablo specialized and trained in olive oil and table olive production in Spain and Italy. He has undertaken valuable olive oil processing research funded by the Australian Government and published numerous research papers on olive processing.

Pablo has broad experience in modern olive oil extraction techniques, olive processing, oil blending and quality control. He has extensive experience in olive oil tasting and has regularly been invited to judge at many competitions including The Australian National Olive Competition, Melbourne's Royal Agricultural Society of Victoria Olive show, Royal Adelaide Olive Awards, Fino Oliva Show in Brazil and the South Africa Olive Awards.

He has had wide-ranging experience in the design and development of olive oil processing facilities and in the continual improvement of their industrial efficiencies.

Pablo is respected worldwide and is a regular key speaker on olive oil and processing courses, conferences and seminars around the world including World Congress.

Pablo is guest professor of the Olive Oil Sommelier Association of Japan since 2014.
